EDUCATION

B.Tech in Computer Science & Technology
Murshidabad College of Engineering & Technology | 2018 – 2022 | CGPA: 8.70

Higher Secondary (Science)
Lalbagh Singhi High School | 2016 – 2018 | 73.4%

DevOps Bootcamp with PMI (Ongoing)
UpGrad KnowledgeHut | May 2024 – Oct 2024

CORE COMPETENCIES

Python Development
NLP & LLM
Root Cause Analysis
DevOps & CI/CD Implementation
Data Extraction & Text Processing
Financial Report Analysis
Containerization (Docker & Kubernetes)
Version Control & Agile Collaboration

SOFT SKILLS

Analytical Thinking & Problem Solving
Attention to Detail
Adaptability
Team Collaboration
Learning Agility
Critical Thinking
Technical Communication

TECHNICAL SKILLS

Programming: Python, SQL, HTML, CSS, C
NLP & AI/ML: LangChain, LLaMA (v3.1–3.2 Vision), CoreNLP, Deepseek, Phi4, Qwen, OCR, ChatGPT
Libraries/Tools: Pandas, NumPy, Regex, Tokenization, Pymupdf, FuzzyWuzzy, Ray, Locust
Web/Frameworks: FlaskAPI, Django, Microservices
Cloud & DevOps: AWS (EC2, S3, Lambda, IAM, ECS, EKS), Docker, Kubernetes, Jenkins, Terraform, Ansible
Databases: MongoDB, MySQL
Version Control & Other Tools: Git, Bitbucket, Postman, RabbitMQ, YAML, JSON, JIRA, Jupyter, VS Code, PySpark
Operating Systems: Ubuntu, Linux, CentOS, Windows

PERSONAL DETAILS

DOB: 3rd October 2000
Languages Known: English, Bengali, Hindi
Location: Murshidabad, West Bengal, 742149

PROFILE SUMMARY

Results-driven Python Developer with **3 years** of hands-on experience and **over 6 months** of expertise as an **LLM Engineer**, specializing in **Backend Automation** and **Large Language Model (LLM)** integration for Financial Document Analysis. Skilled in building scalable, high-performance Python applications that extract, parse, and structure financial data with up to **96% accuracy**, leveraging models such as **LLaMA, CoreNLP, Qwen, Phi, and Deepseek**. Proficient in implementing **end-to-end NLP pipelines, DevOps tools** (Docker, Kubernetes, Jenkins), and **AWS services** for deploying cloud-native applications and maintaining robust CI/CD workflows. Proficient at **automating documentation, enhancing code readability, and applying pre/post-processing techniques** to ensure consistency, traceability, and efficient downstream processing of complex datasets.

WORK EXPERIENCE

PRM Fincon Services Pvt. Ltd. – Kolkata, West Bengal
Python Developer & AI Solution Engineer | *April 2022 – Present*

- Developed and maintained Python applications to analyze complex financial statements, including Balance Sheets, Income Statements, Cash Flow, Notes, Contingent Liabilities, and Trade Receivables.
- Improved accuracy in document parsing by **96%** through code optimization, date normalization, and table structure validation.
- Built end-to-end tools for intelligent tabular processing—date extraction, contextual column classification, image generation from coordinate data, and CSV conversion from financial text.
- Implemented structured logging, exception handling, and automated root cause analysis to boost codebase maintainability and debugging efficiency.
- Developed advanced LLM pipelines using **LLaMA (3.1–3.2)**, CoreNLP, and other models for extracting financial insights and document hierarchy mapping from MSA contracts.
- Normalized unstructured outputs via pre/post-processing logic—token alignment, schema mapping, and text formatting—for LLM-driven automation.
- Automated Python code documentation using tools like **ChatGPT** and **Qodo** for improved clarity, readability, and development efficiency.
- Leveraged multi-modal models to extract structured data from mixed media (scanned tables, annotated images) in financial documents.
- Integrated CI/CD workflows using Docker, Kubernetes, Jenkins, and Terraform for production-ready deployments.

INTERNSHIP

PRM Fincon Services Pvt. Ltd. | Kolkata, West Bengal | March 2022 - June 2022

- Joined as an intern based on performance evaluation and was later absorbed into a full-time role.
- Contributed to backend logic design and early-stage document parsing tools for financial reports.
- Worked under senior developers to gain exposure to best practices in modular Python development, debugging, and documentation.

PROJECTS

AI-Powered Financial Document Processing:

- Developed NLP & LLM-driven workflows using LLaMA, CoreNLP for extracting dates, metrics, & semantic structures from MSA reports & financial statements.

DevOps Pipeline Implementation:

- Automated containerized deployments with Docker, Kubernetes, Terraform, & Jenkins to streamline production rollouts of backend services.

Financial Data Visualization Tools:

- Built dashboards for senior stakeholders to visualize large financial datasets & improve data-driven decision-making using Python libraries.
