Anikate Kairi

Kolkata, India 743126
(M) +916290981543 (E) anikatekairi2020@gmail.com

Summary

Entry-level data analyst and data scientist with expertise in data manipulation and reporting. Proficient in SQL and Python, skilled in developing dashboards and visualizations to effectively communicate insights. Strong analytical mindset with a focus on delivering actionable data-driven solutions.

Experience

03/2025 - 09/2025 **Innofied Solution Private Limited** - Kolkata, India
Junior Associate Software Engineer

- Performed manual testing of web and mobile applications to identify functional defects, usability issues, and performance gaps, ensuring high-quality product releases.
- Developed and executed test cases, test scenarios, and test reports, collaborating with developers to reproduce and resolve bugs efficiently.

01/2024 - 03/2024 **Coding Samurai** - Remote
Data Science Intern

- Acquired proficiency in Python libraries such as NumPy, Pandas, and Matplotlib.
- Executed a project focused on the Amazon sales report to analyse customer behaviour.

Skills

- SQL and Python
- Data analysis with NumPy and Pandas
- Data visualization with Matplotlib
- Test case development and manual testing
- Machine learning techniques

Certifications

- Python for Data Science and Machine Learning Bootcamp from Udemy
- Introduction to Machine Learning From Coursera
- A crash course in Data Science from Coursera

Education

07/2024 **Haldia Institute of Technology** - Haldia, WB
B.TECH: Computer Science and Engineering(Data Science)

- CGPA: 8.55 CGPA

Projects

DIWALI - DATA - ANALYSIS
Technologies Used - Numpy, Pandas, Matplotlib,Seaborn,Jupitar Notebook
• Performed exploratory data analysis using pandas, matplotlib and seaborn libraries.
• Improved customer experience by identifying potential customers across different states, occupation, gender, and age groups.
• Improved sales by identifying most selling product categories and products, which can help to plan inventory and hence meet the demands.

RESUME - CATEGORIZER - APPLICATION
Technologies used - Numpy ,Pandas, Matplotlib, Machine Learning, Scikit-Learn
• Developed a machine learning-based Resume Categorizer application using Python and NLP techniques to predict resume categories such as Data Analyst, Data Science, Business Analyst, and Machine Learning.
• The project involved end-to-end model development, including data preprocessing, feature extraction, and classification, with deployment using Streamlit for real-time predictions.
• Achieved accurate predictions and demonstrated results using visualizations and evaluation metrics.
