S. LEELA SAI PRAMOD

Automation Test Engineer

+91 8197161835 pramod.leela15@gmail.com Bangalore, KA

SUMMARY

Results-driven Automation Test Engineer with 4.2 years of experience specializing in software testing and quality analysis. My expertise spans comprehensive web applications testing across diverse domains, including banking and e-commerce. I excel in designing and executing robust test strategies, meticulously preparing and executing test cases, and ensuring high-quality standards. Eager to contribute to innovative solutions within a quality-driven environment.

SKILLS

Manual Testing | Automation Testing | API Testing | Black - Box Testing | Web Application Testing | Mobile Testing | Selenium Web Driver | Core Java | OOPS | Functional Testing | Smoke Testing | Jira | Sanity Testing | Test Case Preparation & Execution | Re-Testing | Regression Testing | Agile (SCRUM) | Defect Reports | TestNG | HP ALM | Cucumber | BDD | TDD | Browser stack | E-Commerce | POM (Page Object Model) | Log4j | Extent Reports | Postman | TestRail | SQL | Collections | Eclipse IDE | Visual Studio | Banking | Test Scripts Preparation & Execution | Framework Development & Maintenance | Git | GitHub | Java Script | GitLab | Windows | Jenkins | Maven | Bugzilla | Rest Assured | REST | XML | JSON | RTM | SOAP | Oracle Cloud | UI Testing | HTML | Click Up | UI Automation

EXPERIENCE

Automation Test Engineer

Brillio Technologies Pvt Ltd

08/2021 - Present

Domains: e-commerce & Banking

- Conducted comprehensive testing for Core Banking operations, including manual and automated testing for account management, fund transfers, and payment modules.
- Automated functional and regression test suites using Selenium WebDriver, TestNG, and Cucumber BDD, enhancing test coverage and efficiency.
- Developed and maintained automation frameworks, improving test reusability and overall coverage.
- Performed API testing with Rest Assured and Postman, and backend data validation using SQL to ensure data integrity.
- Reported and tracked defects using JIRA, collaborating with developers for swift issue resolution.
- Configured and maintained CI/CD pipelines using Jenkins and integrated GitLab version control for seamless development workflows.
- Actively participated in Agile ceremonies such as sprint planning and daily stand-ups, contributing to team collaboration and project progress.

PROJECTS

LAP – (Banking Domain)

LAP is a core banking module enabling users to make secure loan account payments including EMI, scheduled transfers, and early. Repayments. The project focused on ensuring functional accuracy, security, and compliance of loan-related workflows.

- Designed and automated test procedures and scenarios for loan workflows using Selenium WebDriver, POM, Cucumber, TestNG, and Java.
- Designed test procedures, scenarios and test data for loan workflows.
- Conducted functional, regression, cross-browser and data-driven testing.
- Performed SQL backend validations for loan accounts, EMI calculations and settlements.
- Reported and tracked defects in Bugzilla and HP ALM for faster closure.
- Participated in sprint planning, requirement walkthrough and retrospectives.
- Optimized regression suite execution, reducing testing effort.

Home Depot – (E-commerce Platform)

The Home Depot, a leading U.S. e-commerce platform, offers home delivery, in-store pickup, and online reservations. The project ensured smooth customer journeys across all channels with robust functional, regression, and API testing.

- Developed comprehensive test strategies, RTM, and test cases ensuring full coverage and updated them for CRS and system updates.
- Automated functional flows with Selenium WebDriver, POM, TestNG, and Java, enhancing framework reusability and readability.
- Performed API testing using Postman and Rest Assured, validating services.
- Collaborated with developers and product owners during sprint ceremonies and defect triage, fostering a productive workflow.
- Integrated automation test suites with Jenkins CI/CD pipelines using GitLab.
- Generated execution reports and provided test summaries to stakeholders.

KEY ACHIEVEMENTS

Testing Efficiency Optimized

Reduced testing cycle time by 15% via optimized execution.

Defect Leakage Reduction

Decreased defect leakage by 20% through improved coverage and monitoring.

Enhanced Test Coverage

Improved test coverage by 30% with new automation scripts.

Faster Deployment Achieved

Integrated automation scripts into CI/CD, increasing deployment speed by 25%.
