Prince Yadav

Full Stack Web Developer

pkryadav9304@gmail.com | 9142675809 | Patna, India | PortFolio | Github | LinkedIn

PROFESSIONAL SUMMARY

Versatile and results-driven developer with hands-on experience in SQL, React, JavaScript, Node.js, and MongoDB.
Proven ability to collaborate effectively in team environments, adapt to changing demands, and communicate clearly across technical and non-technical stakeholders. Strong problem-solving skills with keen attention to detail.
Quick to adopt emerging technologies, including Generative Al, and adept at mastering new tech stacks to support project goals and innovation.

EDUCATION

Sandip University 04/2024 – Present
B.Tech in Computer Science and Engineering

Prepleaf By Masai 04/2023 – 04/2025
Career Accelerator Programme Bengaluru

SKILLS

Technical Skills — TypeScript | JavaScript | React | Node.js | Express.js | MongoDB | SQL

Soft Skills — Attention to Detail | Time Management | Problem Solving | Adaptability

PROFESSIONAL EXPERIENCE

FloNeo 10/2025 – Present
Full Stack Developer Intern Remote

- Developed backend automation scripts, APIs, and services to streamline internal processes.
- Implemented task scheduling, error handling, and microservice orchestration to reduce manual work and improve reliability.
- Collaborated with front-end teams to define API contracts and ensure smooth UI–backend integration.
- Contributed to code quality through code reviews, unit testing, logging, and monitoring improvements.

PROJECTS

Loan Organisation System (Floneo Platform) 10/2025 – Present

- Developed a **Loan Origination & Management System** on the Floneo platform to handle loan application lifecycle, approval workflows, and servicing.
- Modeled business logic for loan products — configurable interest rates, repayment schedules, and penalty rules — using Floneo's low-code/no-code modules
- Automated customer onboarding, KYC checks, and document verification to accelerate loan processing and minimize human error.
- Built reporting dashboards to track loan status, defaults, and user behavior, enabling data-driven insights for risk management.
- Ensured system security by implementing role-based access, data encryption, and audit trails for all transactional operations.

Travel Website
Github Deployed
Tech Stack - JavaScript | React | Responsive Web Design | RESTful APIs | Node.js | Express.js | MongoDB

- Developed a full-stack travel planning website using the MERN stack, enabling seamless trip booking and management.
- Implemented dynamic itinerary creation with real-time updates and responsive design
- Integrated secure user authentication and profile management using JWT and bcrypt to protect user data.
