Rohan Dutta

Kolkata, West Bengal rohandutta650@gmail.com +918001424197 website LinkedIn Github

I am a software engineering graduate with fundamental knowledge of full stack Development, prior experience in React, SQL and API handling. Strong inclination towards exploring and learning new technology.

Education

Chandigarh University, Mohali *Aug 2021 – May 2025*
B.E in Computer Science

- CGPA: 7.54/10.0
- **Coursework:** DSA, DBMS, Computer Networks

Bankura Zilla School, West Bengal *May 2021*
Higher Secondary

- Percentage: 91.6 %

Internship

Back-end Developer Intern *Kolkata, WB*
E-Cube Energy Infra Service Pvt Ltd *May 2024 – Jul 2024*

- Worked on the server-side components for EnView Energy Monitor (cloud-based app).
- Optimized the server performance by implementing multithreading, reducing response time by 40%
- Designed a real-time data pipeline to stream and store live energy metrics.
- Tools Used: Python, Node.js, SQL

Projects

StayCharged – Full-Stack EV Charging & Accommodation Booking Platform

- Built a full-stack platform where users discover EV garages/hotels on an interactive map, book slots/rooms, and pay securely via Stripe
- Developed real-time map integration, booking flow, email confirmations (Supabase Auth + Edge Functions), and a complete admin dashboard to list properties, manage bookings, and track revenue
- Tools Used: React, TypeScript, Tailwind CSS, Supabase (Backend + DB + Auth), Stripe Payments, Leaflet/OpenStreetMap

AI-Powered Educational Platform

- Built a full-stack web app offering AI-generated English tests, college search, and teacher booking
- Integrated Gemini API for dynamic question generation.
- Tools Used: React, Node.js, PostgreSQL

YouTube Clone – Full-Stack video Sharing Platform

- Built a complete YouTube-like platform where users can upload videos, watch them instantly, and search through the library
- Tools Used: HTML, CSS, JavaScript, PHP, MySQL

Technical Skills

Languages: C / C++, JavaScript, SQL
Frontend: React, TypeScript, CSS
Backend: Node.js, AWS (Basics)
Concepts: OOP, DSA (Arrays, Strings, Trees, Graphs– 300+ LeetCode), REST APIs

Achievements

Finalist in ThinkTank Ideathon 2023, CU— pitched the idea that later turned into my live EV charging platform (StayCharged)

Core member of Tech Business Incubator (TBI) – organized 5+ tech workshops for 200+ students in Chandigarh University
