Summary

BCA (Honours) student specializing in **software development**, **web applications**, and **automation**. Experienced with Python, Flask, and real-time APIs, including WhatsApp automation, documentation tools, and responsive web apps. Seeking entry-level roles as a **Jr. Software Developer** or in **Full-Stack Development**.

Skills

Languages: Python, Java
Frameworks: Flask, Django (basic)
Databases: MySQL, SQLite
Tools/Platforms: Git, GitHub, WordPress, REST APIs, RapidAPI, Twilio
Domains: Software Development, Web Applications, Automation, Data Handling

Projects

Weather Forecasting App — Flask, REST API 08/2024

- Developed a Flask web app to fetch and display real-time weather (temperature, wind, precipitation probability) via REST API; implemented client-side caching to optimize performance.
- Designed user-friendly UI with semantic components and icons for better usability.

LangChain – Chat with Deep Search — Streamlit, LangChain, Gemini API 07/2024

- Built a multi-source AI chatbot enabling deep search across **Google**, **DuckDuckGo**, **Arxiv**, and **Wikipedia**.
- Enhanced research and knowledge discovery through real-time data access, academic insights, and quick background summaries.
- Open-sourced the project with a GitHub repo for broader community adoption.
- GitHub Repository Link

Document Chatbot with RAG & Groq — LangChain, RAG, Groq 07/2024

- Designed a Retrieval-Augmented Generation (RAG) chatbot for querying PDFs with advanced document retrieval.
- Integrated **LangChain** for semantic search and **Groq Inference Engine** for ultra-fast, context-aware responses.
- Ideal for legal analysis, finance, research, and enterprise knowledge bases.
- Project Code Link

Simple Chatbot Assistant — Python 04/2024

- Built a modular chatbot to handle commands like jokes, YouTube playback, and Google search.
- Ensured robust input handling and extensibility for future NLP features.

Experience

Jr. Software Developer Intern, Kognos Infosystem Pvt. Ltd. (Remote) 08/2024

- Developed a **WhatsApp MedBot** using Twilio + Flask + RapidAPI to automate FAQs and health-related queries; implemented webhook routes and structured templates for consistency.
- Built and deployed a **WordPress** blog with SEO-optimized structure and custom widgets to improve content discoverability.
- Contributed to a **Doctor's Scribe Tool** by creating workflow components for automated note generation and summaries.
- Assisted in developing a **Personalized Nutrition Platform** with rule-based recommendations and form validation for cleaner user data.

Software Development Trainee, Sukhvridhhi (Kognos Infosystem Pvt. Ltd., Delhi) 07/2024

- Completed 6-week industrial training on software and application development with focus on real-world projects.
- Designed and implemented a **fire detection system** using computer vision (YOLOv9), achieving 95% accuracy in flame recognition.
- Integrated flame height estimation and real-time monitoring features for practical safety applications.

Education

Bachelor of Computer Application (Honours) — Dr. B. C. Roy Academy of Professional Courses (MAKAUT) 2022 – 2025
CGPA: 7.99
Major Project: Obstacle Avoiding Arduino Car — Arduino-based robot with dual navigation: manual (Bluetooth mobile app) and autonomous (ultrasonic sensors).
Minor Project: Plant Disease Detection — Web and WhatsApp-based application using ML + image processing to identify plant leaf diseases.

M.A.M.C Township Modern High School (H.S), Durgapur — Higher Secondary (XII, Commerce, WBCHSE) 2022
Percentage: 88.2%

M.A.M.C Township Modern High School (H.S), Durgapur — Secondary (X, WBBSE) 2020
Percentage: 59.29%

Certifications

- **Complete Generative AI Course with LangChain and HuggingFace** by Krish Naik & KRISHAI Technologies. Hands-on experience in building **Generative AI applications** with **LangChain** and **HuggingFace**. View Certificate

Personal

- Strong problem-solving skills, teamwork, adaptability, and clear written communication.
