Profile

Innovative and detail-oriented Software Developer with hands-on experience in building responsive web and mobile applications using React, React Native, and TypeScript.

Work Experience

Software Developer *Weavers Web Solutions Pvt. Ltd* July 2025 - Present

- Developed and maintained mobile applications using React Native and TypeScript, ensuring performance and scalability.
- Implemented Redux Toolkit and React Query for efficient state management and API handling.
- Built and integrated dynamic forms using Formik and backend services like Firebase and Supabase.
- Collaborated with cross-functional teams to deliver user-friendly and visually appealing UIs.

Software Engineer Trainee *Wizard Communication Pvt Ltd* Dec 2024 - June 2025

- Designed and developed cross-platform mobile and web solutions for hospitality and ride-sharing clients.
- Built and maintained reusable UI components, ensuring consistency and scalability.
- Collaborated with UI/UX and backend teams to ensure smooth functionality and deployment.

Core Competencies

- Frontend Development (React, Next.js, Redux Toolkit)
- Mobile App Development (React Native, Expo)
- JavaScript / TypeScript
- Backend as a Service (Firebase, Supabase)
- RESTful APIs & Integration
- UI/UX Implementation & Responsive Design
- Version Control (Git, GitHub)
- Agile Development & Team Collaboration
- Testing & Debugging (Jest, React Testing Library)

Education

Bachelor of Technology - 9.37 August 2020 - July 2024
Brainware University

Projects

Mahjong - Player and League App

- Developed authentication and player–league management features using Supabase and Formik for secure and dynamic data handling.
- Implemented responsive UI components aligned with modern design principles to ensure a smooth and intuitive user experience.

BRT - Logistics

- Built core modules for challan generation and transport management using Redux Toolkit, React Query, and Formik, ensuring smooth data synchronization and a responsive UI.
- Implemented role-based login and access control, allowing transporters, drivers, and admins to securely manage their respective workflows.
- Developed trip and order management modules, including order assignment, tracking, and status updates to streamline logistics operations.

GetSpecific – Online Marketplace App

- Developed a comprehensive e-commerce and service marketplace using React Native and Firebase, enabling users to browse, list, and request both products and services.Integrated real-time chat functionality for communication between buyers, sellers, and service providers, enhancing user engagement.
- Implemented state management with Redux Toolkit and React Query, ensuring smooth synchronization and efficient data fetching across modules.
- Built and optimized dynamic forms using Formik for multiple workflows — including product listing, service request creation, and service management pages.
- Configured Firebase Cloud Messaging (FCM) to deliver instant notifications for new product listings, service requests, and chat messages.

Uvanij - RMS

- Developed and enhanced the Point of Sale (POS) system for Uvanij, an in-house restaurant management product.
- Built key modules such as menu management, table management, KOT (Kitchen Order Tickets), order processing, and billing workflows.
- Integrated Expo for seamless app deployment and improved performance across multiple devices.
- Collaborated closely with backend and UI teams to ensure smooth data synchronization and a responsive user interface.

MetroDTW - Ride Service Web Application

- Developed a ride reservation and management platform with automated email notifications for bookings and confirmations.
- Implemented server-side rendering (SSR) with Next.js to optimize performance and SEO.
- Designed responsive UI components using Tailwind CSS, ensuring a smooth and accessible user experience.
- Integrated web automation for email-based ride reservation workflows, reducing manual effort and improving efficiency.

Certificates

Certificate of Internship - Euphoria GenX

Develop a responsive Currency Converter app using HTML5, JavaScript, Tailwind CSS, ensuring seamless cross-device UX.

Certificate of Industrial Training - Euphoria GenX

Completed a 3-month React.js Development Course focused on building dynamic web applications using React, Redux, and modern front-end practices.

Language

• **Bengali** (Superior) • **English** (Advanced) • **Hindi** (Intermediate)

Award

Best Employer of the Month - February 2025 *Wizard Communication Pvt Ltd*
