PROFESSIONAL SUMMARY

Software Engineer with experience in developing scalable web and mobile applications using React Native, React JS, and FastAPI. Skilled in designing and deploying microservices, building intuitive user interfaces with Figma, and integrating AI-driven chatbots. Proficient in Docker, MongoDB, and AWS, with published applications on the Play Store. Strong problem-solving, collaboration, and communication skills, focused on delivering reliable, user-centric solutions.

EDUCATION

Government College of Engineering And Ceramic Technology 2025-Present | kolkata

Master of Technology in Computer Science and Engineering

College Of Engineering And Management, Kolaghat 2024 | Kolaghat, West Bengal

Bachelor of Technology in Computer Science and Engineering (CGPA 8.61)

EXPERIENCE

Software Engineer | Nov 2024 – Present
Apexium Technologies Private Limited.

- Implemented new features on **PupHub App** and **PupHub Partner App** to enhance user experience.
- Contributed to the development and deployment of **PupHub Web Application** and company website, ensuring seamless functionality and responsive design.
- Managed **microservices deployment**, improving scalability and system reliability.
- Designed intuitive **user interfaces and prototypes** with Figma, translating concepts into functional designs.
- Developed **Chat Service, Blog Service, and Stories Service** using FastAPI for improved performance and scalability.
- Designed and implemented a **RAG-based AI chatbot** leveraging Amazon Bedrock and FastAPI, enabling context-aware conversational responses with real-time knowledge retrieval.
- Implemented and maintained **CI/CD pipelines using GitHub Actions** to automate build, test, and deployment workflows across all microservices and web applications, ensuring seamless **Docker image creation, and automated container deployment on EC2 instances** for smooth and reliable production releases.
- Led the migration of containerized workloads to a serverless architecture using AWS Lambda with Application Load Balancer (ALB) integration**,** reducing infrastructure management overhead, improving scalability, and optimizing cost efficiency.

PROJECTS

PupHub App

- Pet blog and story sharing features for community engagement.
- Integrated **creche, grooming, and clinic booking system** for appointment scheduling.
- Community interaction tools allowing communication among pet owners.
- Built **AI-powered PupHub Chatbot** (RAG architecture) for instant support and personalized recommendations.

PupHub Partner App

- Integrated service booking system for creche, grooming, and clinics.
- Community features enabling interaction among pet owners and service providers.
- Pet blog and story sharing features for community engagement.

DailyDost App

DailyDost is an all-in-one home service mobile application designed to connect users with verified professionals for various services, including home maintenance, car services, personal grooming, and more. The app provides a seamless booking experience, secure authentication, and real-time updates, focusing on convenience and scalability.

TECHNICAL SKILLS

- **Languages:** Java, JavaScript, TypeScript, Python
- **Frameworks:** React JS, React Native, FastAPI
- **Databases & Tools:** MongoDB, SQL, Docker, Git, GitHub Actions, AWS, MobaXterm
- **Other:** CI/CD Pipeline Implementation, Microservices Deployment, Google Play Console App Deployment, Figma

PROFESSIONAL SKILLS

- **Problem-Solving & Analytical Thinking** – ability to debug, optimize, and design efficient solutions.
- **Collaboration & Teamwork** – working with designers, backend developers in agile teams.
- **Communication Skills** – explaining technical concepts clearly to non-technical stakeholders.
- **Adaptability & Learning Agility** – quickly learning new frameworks, tools, or tech stacks.
